

LO calculate the volume of a cuboid 4/2/21

The volume of a cuboid is 680cm^3 . From the numbers listed below, what was the base, height and width of the cuboid? (What were the numbers that were multiplied together to make 680cm^3 ?)

How close can you get? (It is possible to get exactly 680 cm^3).

2.5cm 18mm 0.09m 0.0007km

310mm 0.014m 0.00024km 5.4cm

0.00035km 17cm 29mm 0.048m

0.39m 0.000019km 16cm 150mm
